229/30A, 2nd floor, Gali No-3 Railway Colony Faizalpur Mandawali East Delhi - 110092

A MERN stack developer with expertise in building full-stack web applications using MongoDB, Express.js, React, and Node.js. Skilled in designing and implementing scalable, high-performance solutions that provide seamless user experiences across web platforms.

SKILLS

Python	React.Js	MS-Excel
HTML	Node.Js	
CSS	Express.js	
JavaScript	MongoDB	

PROJECTS

Airbnb Clone

Feb 2024 - March 2024

[Link](#)

The Airbnb Clone is a backend-focused web application built using MongoDB and Node.js, replicating essential features of the Airbnb platform.

Key Features:

- User Authentication: Implemented secure user sign-up and login functionality using JWT tokens and password hashing.
- Create Listings: Users can create property listings, including details like title, description, and pricing, stored in MongoDB.
- Backend Architecture: The application is designed with a focus on efficient data management and secure API development using Node.js and MongoDB.
-

Food Delivery App

March 2024 - Apr 2024

[Link](#)

The Food Delivery App is a full-stack web application developed using the MERN stack (MongoDB, Express.js, React, Node.js), designed to facilitate the seamless ordering and delivery of food from various restaurants.

Key Features:

- User Authentication: Secure user sign-up, login, and profile management, ensuring a personalized experience.
- Order Management: Implementation of a dynamic ordering system that allows users to add items to their cart, place orders, and track order status in real-time.
- Payment Integration: Secure payment processing using [specific payment gateway, e.g., Stripe or PayPal], ensuring smooth and safe transactions.
- Admin Dashboard: Admin functionality to manage restaurants, menus, and orders, with real-time updates and notifications.
